# LIFE CYCLE ASSESSMENT FACTSHEET

March 2025 version 2.1

## TARGET GROUP

The 18935 is part of a collection designed for a broad target group in different work situations within trade, construction, manufacturing, industry and businesses with laundry agreements.

## LONG-LASTING DURABILITY

By analysing fabric performance requirements and collecting data on customer experience, the LCA is verified by Quantis for an estimated duration of service of use in hard working situations and with industrial wash every week.

## CRADLE-TO-GRAVE

Cradle-to-grave is a scoping of the LCA that calculates the entire lifecycle of a product from Extraction of Raw materials to the Use & Wash and End-of-Life stages. Cradle-to-grave results are presented per use according to PEF Category Rules for Apparel and Footwear.

## METHODOLOGY

MASCOT LCAs is mainly based on primary data from own factories and suppliers. MASCOT LCAs are calculated according to ISO14040/44. The method is verified by Quantis and applies to all colours.

Cradle to Gate:  
8,6kg  
CO<sub>2</sub> per  
garment

Cradle to  
Grave:  
0,0754kg CO<sub>2</sub>  
per use

Based on an  
ISO compliant  
methodology  
verified by  
Quantis
